

# Cardiff Office

## Your Commercial Carbon Partner

WORKING WITH YOU TO TACKLE CLIMATE CHANGE

## Auditel helping Brecon Carreg deliver on their strategic objective of reaching Net Zero

*"Sustainability is a core part of the Brecon Carreg brand. We've already made the commitment to produce packaging from 100% recycled content by 2025 and we are also investigating the possibility of installing solar panels which could potentially provide up to 40% of our energy."*

**David Stockley, Managing Director, Brecon Carreg**

## Ashtree now a PAS 2060 verified carbon neutral business with Auditel as their Carbon Partner

*"Ashtree has always been environmentally conscious as a business and to now be able to say that we are a verified PAS 2060 carbon neutral business makes me very proud."*

**John Roper, Managing Director, Ashtree Vision & Safety**

# Who are we?

---

**UK Analytics are an Auditel member firm based in Cardiff. As a business we can support national coverage and can provide several carbon management services.**

We specialise in carbon management and reduction. We have built a practice and have produced high quality work for many clients. Our entire team have been through extensive training and are qualified BSi and NQA Associates.

We offer.

- Carbon Accounting
- Support & training
- Mentoring

## OUR EXPERIENCE

---

- The first UKAS accredited PAS2060 client in the UK.
- Over 30 1st year carbon footprints completed across many business sectors.
- 2nd year carbon footprints in build, including a second year PAS2060 verification.
- Auditel internal verifier trainers
- All work completed to PAS2060, ISO14064-1, & PPN06/21

## OUR PROPOSITION

---

- We can help you across the three key areas, **strategy and planning, delivery, and solutions.**
- Our end-to-end full-service proposition starts with Strategy & Planning.
  - Education and climate change awareness play a key role at each Stage to engage staff and stake holders. We work with any platform required including webinar presentations, group team training, or indeed 1 to 1 C-Suite level mentoring.
  - When clients confirm engagement, our delivery process begins.
  - We have established a unique Carbon Management System (CMS). We have a simple to understand, robust, and transparent process.
  - Our suite of solutions starts to offer strategic clarity at an early stage in the process.
  - As the results of the foot printing process unfold, our strategic plan begins to form. Our advice may be standard with a publicly available carbon reduction plan.

## OUR SERVICES

---

We specialise in carbon, our team is experienced and can help across many levels of carbon management and reporting.

- Carbon inventory reporting
- Carbon reduction planning
- EPD (Environmental Product Declaration)
- LCA (Life Cycle Assessment)
- Full scope PAS2060
- Full Scope PAS2050
- Full Scope PAS2080
- Full scope ISO14064-1
- Carbon training
- ESOS (Energy Savings Opportunities Scheme)
- SECR (Streamlined Energy & Carbon Reporting)
- TCFD (Task Force on Climate-Related Financial Disclosure)
- CBAM (Carbon Border Adjustment Mechanism)
- SBT (Science Based Targets)
- Auditing & Verification
- Mentoring

# Tried and tested process

---

Since the conception of carbon footprinting, we have been working on the process, we believe we have developed a process that produces the highest quality of work and ensures that all possible scopes are covered and thoroughly screened.

We hold ourselves internally accountable for every project we embark on and strive to complete a comprehensive, meaningful, and robust outcome. We have weekly project meetings with the entire team where we discuss each project in detail.

## OUR CMS (CARBON MANAGEMENT SYSTEM)

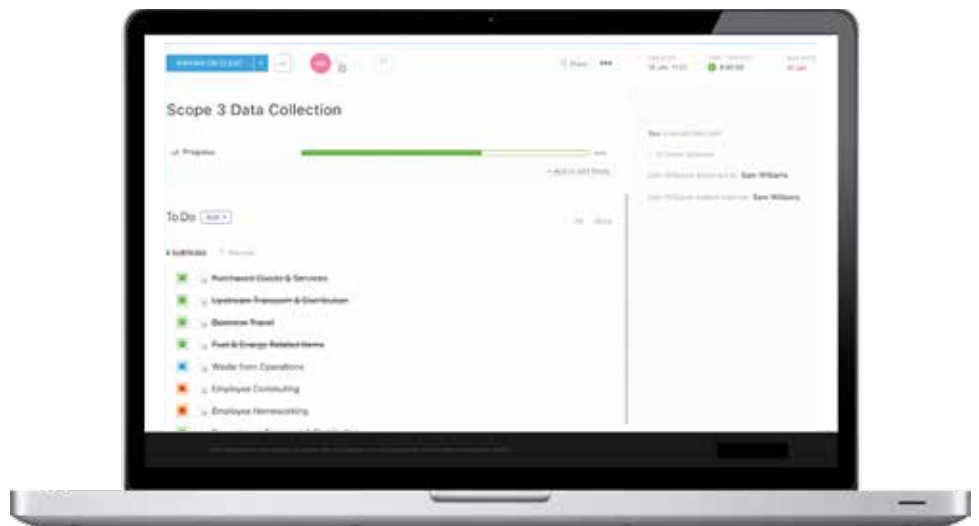

---

We have built our own system to track and run our projects to make sure that our delivery dates are met consistently, we have not delivered late on any project to date, including where the client has been slow to provide data.

- Track each product through the stages.
- Time tracks all work to provide accurate proposal building and costing.
- Our own dedicated workbooks
- A suite of client facing documents that provide relevant information.

# Why us?

---

**There is only one way to produce a carbon inventory and reduction plan and that is the right way. It must be forensic in its detail leaving no stone unturned and be delivered to a standard and quality that can successfully undergo 3rd party verification. As a team, we are always striving to deliver the highest possible quality of work quickly, efficiently and at a cost that reflects the project and the work involved.**

Tracking all time spent on every carbon project means that we price based on experience and we are accurate because of this.

We have worked hard on our processes and our management tools and encourage innovation throughout the business.

Our pledge to our clients is to deliver an accurate, robust, and meaningful carbon inventory, plus a robust and achievable reduction plan, we will work with you and hold you to account on your climate and sustainability targets, we will not allow you to be accused of greenwashing and will work with your marketing department to ensure that all statements published can be backed up.

Our team is in constant training, there are always new things to learn as the industry develops and improves, we make sure we are at the forefront of this, as a member of the Greenhouse Gas Management Institute and our close relationship with BSI, we always stay ahead of the curve on standards and methodologies.

Auditel's internal verification department check every inventory that we produce, this is undertaken by one of Auditel's member firms that have been trained in verification and all are conducted under ISO14064-3 the standard for verification.

We look forward to working with you.

## **Huw Williams**

Principal Carbon Accountant & Verifier

## Our specialist carbon team

---

### Huw Williams

Lead carbon Specialist & Internal Verifier

As an Associate Consultant of BSI and NQA Partner Consultant, Huw is qualified in the GHG Protocol Accounting & Reporting Standard and ISO14064-1 to deliver PAS2060:2014 and has worked with many organisations to calculate their carbon footprint and create carbon reduction plans. With over 30 years' experience in sales and operations, Huw has worked in OEM manufacturing, and has project managed several high-profile clients.

### Sam Williams

Carbon Accountant

Sam has a BSc in Marine Geography; he is passionate about the environment, and this steered towards his chosen career as a carbon Accountant.

Sam believes that by helping businesses reduce their carbon emissions that a real change can be made in the fight against climate change.

### Emily Tucker

Carbon Accountant

Emily has a BSc in Geography and more recently gained an MSc in Public Health. Passionate about the environment and business, becoming a Carbon Accountant was the obvious career choice.

# Our carbon services

## SECR

Streamlined Energy and Carbon Reporting (SECR) was introduced in 2019, as legislation to replace the Carbon Reduction Commitment (CRC) Scheme. SECR requires obligated companies to report on their energy consumption and associated greenhouse gas emissions within their financial reporting for Companies House.

## ESOS

Organisations that qualify for ESOS must carry out ESOS assessments every 4 years. These assessments are audits of the energy used by their buildings, industrial processes and transport to identify cost-effective energy saving measures.

## Carbon Footprint Reporting (CFR)

A credible CFR that meets PAS 2060 specification must meet certain professional standards. Producing a poor quality CFR can put your brand at risk. With Auditel your CFR will be prepared in line with all the requirements of the BSI PAS 2060 specification. Accounting for emissions helps identify reduction opportunities, increasing materials & energy efficiency and aid in the development of new products and services that reduce the carbon impacts.

## Carbon Reduction Planning (CRP)

An effective CRP will deliver cost savings to your business by putting in place a short, medium, and long-term strategy to reduce your Greenhouse Gas emissions. Our approach will prioritise these projects with fully costed business cases. Where capital investment is required, alternative funding sources will be considered. These include effective procurement reviews of other cost areas to release cash flow or by helping you tap into the ever-expanding sources of green funding. Auditel then ensure you can measure the outcome of the initiatives you've completed. This is an important part of the requirements of PAS2060.

## Carbon Offset Purchasing

Once practical emission reduction has occurred, you might want to consider the purchase of Carbon Offsets from a provider of High-Quality Voluntary Carbon Offset projects. Auditel's understanding of this fast-moving marketplace combined with almost 30 years procurement experience will ensure you acquire the right Carbon Credits at the right price.

## PAS 2060 Verification

If you decide you want to gain formal verification of your Carbon Neutral claims, then PAS 2060 verification is next and Auditel will assist you all the way. Including the preparation of your Qualifying Explanatory Statement (QES), price comparisons and selection from different verification bodies and finally, marketing assistance to get the most from your achievement of Carbon Neutrality.

## Auditel help EXPORTA, strategically execute their commitment to Net Zero

*“Our customers can be sure they’re working with a supplier committed to sustainability. It’s easy to make the right noises about being green and sustainable but it takes work to actually take action and really make a difference. For our customers looking to work on their own emissions, they know that Exporta is the sustainable choice when it comes to plastic pallets and other product handling goods.”*

**Shona Laing, Head of Business Services**

## Auditel help ‘Make CMD Carbon Free’ while on their journey to Net Zero

*“Auditel’s support has been exceptional. It helped us create our vision of making CMD Carbon Free. This journey to net zero will become part of our culture as a company. We have got posters around on our walls and we are giving each department the opportunity to consider challenging our suppliers to ensure we are considering carbon impact as well as price and quality.”*

**Jamie Cox, Operations Manager**

## Auditel help P3 take action to measure & drive towards becoming Net Zero

*"It is our responsibility to act in the interest of our stakeholders; the people we work alongside, our staff, our volunteers, and every single person in the communities we serve, to take action starting now. The work we are doing with Auditel will help us measure and drive our progress towards becoming Net Zero."*

Mark Simms CEO, (P3)

## How to reach us

We would welcome discussions with you around your carbon requirements, to start the conversation contact me using the details below and we can set up a Teams meeting to discuss your needs in more detail.

**David James**

With over 30 years' experience in business development and client management, David has vast experience in manufacturing and relationship management.
